Learning how to improve the health of the public has become a summer tradition at the University of Washington. This August, the 19th annual Summer Institute for Public Health Practice will take place on the UW Seattle campus. The Summer Institute will run from August 9-13 and is sponsored by the [Northwest Center for Public Health Practice](#) in the University of Washington's School of Public Health.

Participants from across the country will discuss what is current in public health practice and hear from leading experts on cross-cutting issues. Practical, case-based training is a Summer Institute trademark, and all courses are designed to be relevant to both emerging and everyday challenges. Summer Institute participants will also be able to network with colleagues from across the nation.
